

SPS Build Team: The Musical

By

SPS Build Team

Date: Spring 2026

Scene 1: BUILD TEAM ROOM - 7:00 PM

John Bernoulli stands in the middle of a bunch of circling Build Team members. They are all rushing around and "working" on their demos while John Bernoulli stands with a disapproving look.

JOHN BERNOULLI
(something something you guys are
having too much fun can we work on
something rigorous)

BUILD TEAM CAPTAIN
John, these demos are important! We
need to present them to those middle
schoolers next week!

JOHN BERNOULLI
Middle schoolers? Who cares about
stinky middle schoolers? How about we
deduct a new theory for quantum
gravity!

BUILD TEAM MEMBER 2
Hey, I'm having a lot of fun working on
this Assassin's Teapot! Look at how it
goes!

Build Team Member 1 proceeds to use the Assassin's Teapot and
spray some water into John Bernoulli's face.

JOHN BERNOULLI
Hey! Don't spray me! Hydrating will
reduce my ability to study Lagrangian
mechanics!
(short break)
Now, can you guys put your weird little
demos away! You guys are all
drastically too unserious!

BUILD TEAM MEMBER 2
Oh John. That's the point of Build
Team. Let me show you...

The Build Team members all break out into song. They begin to
sing the Build Team Anthem. John Bernoulli prances around in

anger, not speaking, but routinely silently crashing out at different club members.

Yeah im out the JROWL,
Now im down in DCC

Right next to chemistry
But ill be physics forever

Im the new lagrange
And since i made it here

I can make it anywhere, yeah
They love me anywhere

I used to study tmech, hola
My grad students

Right there in Sage labs
Brought me back to office hours

Took down some notes
Following the textbook

Catch me in the HBH
Like a Max

Cruising down to Build Team
Getting stuck in the hall ways

Walking so slow
But the key is with Henry

Me? I'm in that physics
Home of that boy einstein

Now I live on monster
And I brought up my heart rate

Say what up to korniss
Still doing stat mech

Sitting deskside,
Professors giving me high fives

I be spiked out I could trip a freshman

Tell by my attitude that I'm most definitely from-

Partway through the song, we hear a huge crash sound and everyone stops singing.

JOHN BERNOULLI

You guys are so unprofessional!

Singing and dancing like this is some sort of game! This is a physics Club! Stop having fun and get to work!

BUILD TEAM CAPTAIN

John, it's okay. We can take a little break to have some silly fun.

JOHN BERNOULLI

Silly fun? Silly fun! You think that's what matters! You guys are so stupid! None of you have the right to call yourselves physics students!

BUILD TEAM MEMBER 2

Hey, John that's a little mean, man! Chill out!

BUILD TEAM CAPTAIN

Yeah, John we're all just trying to be friends here. You need to calm down.

JOHN BERNOULLI

That's your problem. You guys are so concerned about your stupid "friends" that you guys aren't focused on physics!

BUILD TEAM MEMBER 2

John there's more to life than getting better and better at physics!

If you spend your whole life worried about-

JOHN BERNOULLI

"More to life than physics", puh-lease. As if. That's why I ALWAYS hated you. ALL of you guys suck!

BUILD TEAM CAPTAIN

John! That's enough! You need to stop right now!

JOHN BERNOULLI
Come on! You guys are insufferable.
Look you all just broke this thing and
everyone's more mad at me than they are
at themselves. Shame!

BUILD TEAM CAPTAIN
Because John, if we're going to fix
anything, we need to do it as a-

JOHN BERNOULLI
What? You were gonna say, "as a team",
give me a break. Teams are overrated.
I'm gonna run to the tech dump and put
something together to fix it that's a
million times better than any crummy
things you guys could make! Then you'll
see how right I am!

BUILD TEAM CAPTAIN
John wait!

John runs off before anyone can convince him to say. People are
sad the song didn't get finished. :(

(SCENE CHANGE)

Scene 2: TECH DUMP - 7:10 PM

John walks over to a big cardboard box. He rummages through the
box, mumbling to himself. He falls headfirst into the box. Scene
changes to tech dump land.

(SCENE CHANGE)

John gets up and looks around.

Scene 3: MAGICAL FOREST - X:00 PM

P is looking around frantically, as if hearing noises coming
from all directions and trying to see into the dark undergrowth.

JOHN BERNOULLI
This sure is a scary forest, why is
there no one else here?

A rustling noise is heard from the bushes and John Bernoulli whips his head in the direction of the sound.

JOHN BERNOULLI
(Scared) Is is is somebody there?

More rustling but no response

JOHN BERNOULLI
(Scared) H-hello?

False Korniss jumps out of the bush quickly and energetically

FALSE KORNISS
Greetings young man!

JOHN BERNOULLI
Gee Willickers! You scared me! Who the hell are you?

FALSE KORNISS
I am Dr. Korniss, esteemed physicist and keeper of beasts large and small.

JOHN BERNOULLI
I'm John Bernoulli, I am lost in these woods and trying to get home. What do you mean by beasts?

FALSE KORNISS
(Gesturing to the scenery around him)
There are horrible beasts out there in the world. They are harbingers of pestilence and war, famine and disease. I created them to protect physicists like myself while we worked. One day, an engineer stumbled upon me and my beasts in the forest. He saw their potential and he convinced the beasts to go with him.

JOHN BERNOULLI
Why did you create these beasts if they bring so much suffering?

FALSE KORNISS

(Sigh) They were corrupted by the engineer. He sought to use the beasts as the backbone of his new inventions. When the beasts realized they were going to be used like machines, they became angered at the engineer and all those around them who used his inventions. They destroyed the engineer's village, and all who lived there. Now they roam the countryside, looking for more villages and engineers to eliminate from this world.

JOHN BERNOULLI

That's horrible! I can't believe people would try to use the beasts like that.

FALSE KORNISS

Only beings as corrupted as man could corrupt creatures as pure as the beasts. But the beasts are simple-minded. Now that they have been angered, they will not stop until they are killed. You must go out and slay all of the beasts before they destroy the villages of the world in anger.

The low growling rumble of a beast can be heard coming from nearby. John Bernoulli jumps at the sound.

JOHN BERNOULLI

(Scared) What was that?

FALSE KORNISS

Do not be afraid, that is the one beast who stayed with me. He was not corrupted by the engineer. I want you to take him with you on your quest. He will stand loyally by your side.

JOHN BERNOULLI

I don't know about this. I don't think I'm cut out to go on a hunting spree. And quite frankly, I just met you. Don't you think it's a tall ask for me to risk my life to clean up your mess? I'm only in this forest because I want

to go back home, not to get involved in some stranger's mess.

FALSE KORNISS

Well we have introduced ourselves, so now we are friends, not strangers. And I see potential in you John. You're not the first person I've encountered here, but you're the first I've asked to help me.

JOHN BERNOULLI

I'm sorry Dr. Korniss, but I'm not special and I don't have the time or the ability to slay the beasts if I'm ever going to get home.

FALSE KORNISS

I can lead you home, but only if you slay the beasts. It is too dangerous for me to lead you while they are still out there. Slay them, and return to me, and I will guide you home.

(Sticks out hand for a handshake)

Deal?

John Bernoulli thinks it over for a second.

JOHN BERNOULLI

(*Shaking False Korniss's hand*)

Deal!

FALSE KORNISS

Excellent! (*Pointing stage right*)
Follow this path to the east until you reach the nearest village. It shouldn't take more than half a day. I will command my beast to follow you, but he is shy and he will probably not show himself until you emerge from the forest. Good luck John.

JOHN BERNOULLI

Thank you Dr. Korniss. One more question, what is the beast's name?

False Korniss

Stephen Van Rensselaer, he will respond to his full name only.

John Bernoulli nods and starts to follow the path towards stage right.

(SCENE CHANGE)

Scene 4: MAGICAL FOREST - X:00 PM

John Bernoulli is walking.

ASSASSIN

Be careful! Don't you know there's a
beast around here that could have
killed you?

JOHN BERNOULLI

Of course I know about the beast,
that's the reason I'm here, to slay the
beast and convince Korniss to send me
home.

ASSASSIN

We may have the same goal, then. I also need to deal with the beast to prevent it from hurting more people.

(Pulls out two bottles)

I have this poison which should slay the beast, but I don't know how I can give it to the beast.

JOHN BERNOULLI

[illegible]

(Begins pacing)

You're an assassin, have you heard of the assassin's teapot?

ASSASSIN

No, I'm not too up to date on the latest technology.

JOHN BERNOULLI

It's an ingenious invention, really, it uses a difference in air pressure and surface tension to allow one to

alternate which liquid is being poured
out of the teapot. It also never
breaks.

ASSASSIN

So you propose we invite the beast for
a delightful teatime, lower its guards
by pouring our tea first, and then
poison it with the torturous death
poison. I like this plan.

John Bernoulli and the Assassin return to the place where they
first met the beast and place an RSVP at the edge of the area.
The Beast picks it up and looks briefly puzzled. Some time later
The Beast arrives at the teaparty, where there is a well set
table. John Bernoulli and the Assassin look frightened by Beast
Alpha.

BEAST ALPHA

Excuse me, but was this the location
where I was kindly invited to a most
delightful tea party?

JB and A nod silently, still apprehensive about the beast.

BEAST ALPHA

Wonderful, it has been so long since I
have had a well steeped sleepytime
vanilla, I must confess to having
missed it.

ASSASSIN

I had no idea you were such a tea
fanatic.

BEAST ALPHA

Like I said, it's been some time. The
Engineer who created and raised me used
to make some wonderful brews. I... I miss
him.

JOHN BERNOULLI

...Is that why you've been lashing out at
people?

BEAST ALPHA

I suppose it is.
(The Beast pauses regretfully)
That now seems to be a rather harsh
response.

ASSASSIN
Harsh!?! You've hurt countless people!

THE BEAST
I did, and for that I am sorry. I will
do what I can in the future to right
those wrongs.

John Bernoulli and the Assassin make eye contact and nod. The
Assassin then pours tea into all three of the glasses. After
drinking some tea the beast yawns loudly.

THE BEAST
I seem to be very tired, could I lay
down here for a moment.

JOHN BERNOULLI
Of course, make yourself comfortable.

The Beast dozes off and begins snoring.

JOHN BERNOULLI
So what do you plan to do now,
Assassin?

ASSASSIN
Well, if you wanted some help with the
rest of the beasts, I don't have
anything better to do.

JB smiles and the two of them walk off into the next scene.

(SCENE CHANGE)

Scene 5: SMALL VILLAGE - X:00 PM

John Bernoulli stands with Assassin, both looking around a small
village. Assassin is slinking around peering at things
stealthily. John Bernoulli is just kinda standing there.

ASSASSIN

Are you sure this is the right place?

JOHN BERNOULLI

Of course I am! You think I'd be wrong about this? This is trivial. (*Scoffs*)

ASSASSIN

Okay... But... (*Side eyes John Bernoulli*)
Are you sure? Sure-Sure? It's a bit... quiet.

Pie tin babies come running in chaotically and noisily, making strange pie tin baby noises. They run around John Bernoulli and Assassin and around the stage. Assassin and John Bernoulli stare wide eyed.

JOHN BERNOULLI

(*To Assassin, obnoxiously*) Told you.

Scientist, looking very frazzled, comes crazily running in towards the pie tin babies, brandishing- something- towards them. Something sciencey and not something expected for brandishing. Scientist gestures menacing towards them until they leave, going offstage. (Think grumpy grandpa making neighborhood teens get off the lawn)

SCIENTIST

(*Still brandishing the object*) Hah!
That's right, leave! And stay gone this time!

(*Finally seems to notice J and A, hastily puts object down. Or brandishes it at them instead, your choice*)

Ah. Hello. Sorry about that, we've been having a problem with invasive baby pie tins recently. They just won't leave! And who are you?

JOHN BERNOULLI

John Bernoulli, here to save your town!

Scientist looks very unimpressed. Scientist turns to look at Assassin.

SCIENTIST

And you?

ASSASSIN

Yeah, I'm not telling you my name.

SCIENTIST

Well, in any case, both of you need to go. These pie tins have been running about the village causing havoc for days now, and I haven't managed to make them leave. It's a serious safety concern, and you need to stay away for your own good.

JOHN BERNOULLI

That's ridiculous, they're just pie tins!

A pie tin baby runs in and pokes john and leaves.

SCIENTIST

See? They are a hazard. Now, take my advice and get a move on while you can.

JOHN BERNOULLI

No, we're here to stop them.

ASSASSIN

We're staying.

SCIENTIST

Well, I suppose I can't stop you. In that case, let's brainstorm at the lab. You can help me stop them.

(SCENE CHANGE)

Lab - X:00 PM

ASSASSIN

That's a lot of awards. And wires. And... a (insert strange unexpected thing that is in either Build Team or a teacher's office or somewhere else. Ex. Bike

lock, orange, banana, egg beaters,
rake, duck, dead rigid cat, etc.)????

SCIENTIST

Yes, well, I've had quite the career,
and you never know what you'll need
when you're doing physics. I decided to
settle down and I built this lab in the
village, but now the pie tins are
ruining it all.

JOHN BERNOULLI

We'll stop them.

SCIENTIST

Yes. We'll need to use the Van de
Graaff generator to repel them away
from the village but I'm not sure how
to get the pie tin babies all to come
to it and be in one place. As you saw
today, they're very hard to corral.

JOHN BERNOULLI

I know! We can attract them with a
large magnet! Their electron spins will
align with the magnetic field and they
will experience an attractive force!

SCIENTIST

That's not going to work.

JOHN BERNOULLI

What do you mean, of course it will
work! It's basic physics! You're a
scientist, you should know this!

SCIENTIST

Well, I don't exactly have a giant
magnet just lying around somewhere. But
even if I did... John, aluminum is
only paramagnetic. With the strength of
the magnet needed, there's no way using
it to attract the pie tins is at all
practical.

JOHN BERNOULLI

It doesn't need to be practical!

SCIENTIST

What? Of course it does! You're being ridiculous, I can't work with you. Now leave, so I can create an actual working plan.

JOHN BERNOULLI

You're the one being ridiculous! You can't tell me to leave, you need me to help you!

SCIENTIST

I don't know where you got that idea in your head, young man, but I absolutely do not!

John Bernoulli and the Scientist devolve into arguing. Throughout all of this, the Assassin has been slinking around the laboratory, observing and inspecting various equipment and objects. Now, the Assassin comes forward, holding something.

ASSASSIN

Neither of you are thinking. It's obvious what we should use as bait.

John Bernoulli and the Scientist look over. The Assassin shows them what she is holding, to reveal..... PIE!

ASSASSIN

I'll set it up in the middle of town while you physics people get the Van de Graaff sorted.

The Assassin quickly leaves before anyone can protest. It seems assassin skills come in handy sometimes.

JOHN BERNOULLI

Pie?! There's no way that'll work.

SCIENTIST

Not very scientific, true. We disproved Aristotle's idea that all things move towards their natural place ages ago. But perhaps a like of pie could explain why the pie tins bother the baker so much. It's worth a shot. In any case,

she's gone already, there's nothing we can do about it now.

JOHN BERNOULLI

Fine. Where's the Van de Graaff?

SCIENTIST

Right over... *(walks over to it)* here. But we should test it to make sure it will be powerful enough. Once we turn the Van de Graaff on, it should create an electric field with the large metal building in the abandoned town next to us. Then the pie tins will fly away to the abandoned town.

They test the Van de Graaff. It is not working good. They need to fix it.

JOHN BERNOULLI

I didn't even feel a shock. We definitely need to fix it. [name] and [name] were working on fixing the one in Build Team the other day.

SCIENTIST

Do you remember how they fixed it? If so, I could just leave you to work on this while I help set up.

JOHN BERNOULLI

(Thinks back. Realizes he doesn't remember)

No... I wasn't paying any attention.

SCIENTIST

Okay. The first thing we should do is clean it to make sure it isn't dirty.

They try cleaning it.

JOHN BERNOULLI

It's not very dirty.

SCIENTIST

Maybe we just need to figure out a way to make it stronger. It works with a belt and two rollers, and the bottom roller is made of a material that is more likely to grab onto electrons than the belt, so the belt gets positively charged. And then at the top of the Van de Graaff, there is a metal comb near to but not touching the belt. The electrons in the comb are attracted to the positively charged belt, and the comb is connected to a sphere which gets positively charged.

JOHN BERNOULLI

Can we switch out the material for a better one?

SCIENTIST

We can try. I have some nylon we could use in order to increase the positive charge on the belt.

JOHN BERNOULLI

Great, I can put it in.

They fix the Van de Graaff.

JOHN BERNOULLI

It's fixed! Now let's take it to the pie tins.

(SCENE CHANGE)

SMALL VILLAGE

The pie tins are gathered around, all eating pie. John and the scientist set up the Van de Graaff at the table near the pie tins.

SCIENTIST

Turn it on!

They turn on the van de Graaff and the pie tins begin to slowly be forced away, still eating their pie. (I think they put the pie tins on the Van de Graaff and then leave, eating pie)

JOHN BERNOULLI
We did it!

Intermission

(SCENE CHANGE)

Scene 6: TECH DUMP FOREST - MIDDAY

John, the Assassin, and the Scientist are walking through a clearing. All three are weary from the long trek after leaving the village. John looks up from studying his map, confused.

JOHN BERNOULLI
I don't understand. The map says the last beast should be right here.

ASSASSIN
John, we've been walking around these woods forever. Can't we just rest?

SCIENTIST
You must be misreading it. Let me have another look.

Suddenly, they all freeze. The Assassin turns around so that the three are standing back to back in the middle of the clearing. An eerie silence covers the scene. A loud crash stage right. All three look that direction, False Korniss enters stage left. John looks back first.

JOHN BERNOULLI
(Relieved) Oh, Korniss, it's you! We haven't been able to find the last beast anywhere.

SSINROK
Well John, I suppose I should tell you the truth. But first I must congratulate you.

JOHN BERNOULLI
On what?

FALSE KORNISS

On defeating my two challenges, of course.

ASSASSIN

What do you mean *your* challenges?

SSINROK

I've been watching you, John. You've proved quite the capable young physicist. Personally, I didn't have that high of hopes for you, especially after your first encounter with my monster.

ASSASSIN

I don't like where this is going.

JOHN BERNOULLI

Look Korniss, I don't know what you're talking about. The only thing I wanna do is defeat this third beast and get outta here. Could you just show us where it is?

SSINROK

There is no third beast, John. The monster, the pie tin babies, they were all there to test you. And my real name isn't Korniss. I am Ssinrok.

SCIENTIST

So that was your doing? Those pie tins ravaged my village for weeks, and all for what, this silly little game you're playing?

FALSE KORNISS

But it's not just a game. John has proved his worthiness, by his victory against my monster and his ingenious strategy for getting rid of those pie tins. John, I'm here to offer you a position in the new ruling class.

ASSASSIN

We helped with those things too! And besides, he doesn't want to join you, Korniss.

John Bernoulli stares, enchanted, at False Korniss.

SSINROK

Doesn't he? Let's hear what he has to say.

JOHN BERNOULLI

What kind of position?

SSINROK

I'm assembling the best and brightest to take over this world. We'll run things the way they should be done, on engineering principles.

A pause, John still enraptured and slowly drifting toward False Korniss.

SSINROK

John, I took a chance on you. I'm not sure why exactly. Maybe I saw a bit of myself in you. Prodigious, self assured... but still unpolished. You can do great things if you join me.

ASSASSIN

Don't do it John, it's a trap!

SCIENTIST

It's not worth it! Think of us, think of the townspeople. What kind of leader would do this stuff?

SSINROK

Don't let these people decide for you. This is your dream, the chance to be free from others tying you down. Leave those little physics demos behind, join me in engineering, that's where the real work gets done.

Another sound from stage left. Money Guys enters. Everyone looks over, John momentarily breaks out of the trance.

MONEY GUY

Wait!

SSINROK

Leonard, I wasn't expecting you yet.
Take these two away.

*(Gestures towards the Assassin and
Scientist)*

MONEY GUY

Ssinrok, I'm- I'm done following your orders. John, you need to listen to me. A long time ago, Ssinrok told me the same things he's saying to you now. At the time I knew him only as Korniss, the well-meaning physicist who sought my help to clear the land of the beasts.

SSINROK

That's enough, Leonard.

MONEY GUY

I passed his tests, just like you. He gave me the promise of a better world, he told me I would never have want of money, or fame, or power. I hope you don't think too poorly of me, but I took his offer.

JOHN BERNOULLI

And... then what happened?

MONEY GUY

I have worked for him, tirelessly, ever since. And he has paid me well, as promised. But it is soulless work. Day in and day out, I've toiled away under his command. Please John, I know it may seem silly, but cherish these opportunities to work on demos, to do fun projects, while you can. I wish I could go back to those days, but it's too late for me. Don't make the same mistake I did.

SSINROK

John, I'm done waiting for your answer. Are you with me, or are you against me?

JOHN BERNOULLI

I...

ASSASSIN

It's not worth it John. Listen to what that weird guy said.

SCIENTIST

Think of what those pie tins did to my village! The horror! The horror!

SSINROK

This is your last chance.

JOHN BERNOULLI

I- I can't do it Korniss, or Ssinrok, or whatever your name is. I can't betray my friends like that. Overcoming these challenges, I've learned that there's more to life than just knowing facts and equations.

SSINROK

I hate to do this, but you leave me no choice. Feel the wrath of my air cannon!

Ssinrok grabs the hidden air cannon, and fires. John, the Assassin, the Scientist, and Money Guy stand perplexed for several seconds, until they are abruptly toppled over by a large gust of wind.

JOHN BERNOULLI

Quick, follow me!

All four scramble to their feet and run off stage right. Ssinrok pursues.

(SCENE CHANGE)

Scene 7: TECH DUMP FOREST - NIGHT 2X:00

Stage begins empty.

NARRATOR

The Build Team ran. And ran. And ran. So great and terrible was SSINROK's power that they ran until they could run no more. And kept running.

NARRATOR

(*Somber*) There is no machine that works forever. Eventually, all tools, no matter how sturdy, will billow smoke and fail. Repair, of course, is always possible, our heroes know this well. But what happens when there is nobody to cure the doctor? Nobody to fix the repairer? The once-steadfast machine becomes the lowest of the Lowe, reduced to mere technology in a dump.

Narrator pauses. Protagonist, Assassin, Money Guy, and Scientist enter.

NARRATOR

And so, the Build Team found themselves in a dump of their very own.

Protagonist, Assassin, and Scientist sit down in a loose circle. Money Guy kicks the ground a little bit and turns away a bit.

SCIENTIST

(*Forced cheerful*) Okay, now that we're all gathered here, I'd like to introduce you all to my new schematic, the super cancer ray! We might not be able to beat him, but what if he beats himself?

MONEY GUY

I don't know, what if- what if he's immune to cancer... Yeah I bet that's it, he has to be! No wait, I bet he's listening to us right now...

Money guy starts looking around frantically.

JOHN BERNOULLI

Ugh! Do you even hear how lame you sound right now? Sit down, we need to think of something *REALISTIC* soon.

Money guy sits down and rocks back and forth, terrified, for a little bit.

ASSASSIN

He's seen our demos now, he knows how they work... but what if we use them in a different way?

Scientist locks in.

ASSASSIN

The Van de Graaff generator looks pretty heavy the rest of you could throw that and maybe something else at him. A new projectile motion demo!

SCIENTIST

I think you might be on to something, while he's distracted you can sneak behind him and write bad reviews on ratemyprofessor.com!

MONEY GUY

Did you actually know that over 70% of all internet traffic goes through Amazon Web Services, Google Cloud, and Cloudflare. I bet they have contracts with the NSA or something, he'll know what we're up to...

ASSASSIN

But if he's distracted by the demos... this might just work.

SCIENTIST

Don't worry Money Guy, believe in the demos. They'll get us through this.

MONEY GUY

I've just felt so lost recently, I-

John Bernoulli gets up pretty quickly and is angry.

JOHN BERNOULLI

I'm so done with you freakazoids! I can't do this anymore! (Miming head speaking with hand and in falsetto)
Ooh, I'm Build Team and I love demos so so much, oh Build Team demo do my

homework, Build Team demo take my exam.
BAH! And you call yourselves
physicists? The only demo you need is
the human mind!

Bernoulli storms off to one side of the stage, pacing. The rest of the cast sneaks off. John Bernoulli makes their way back to the center of the stage and takes a seat (preferably a bench or chair).

JOHN BERNOULLI
Physics demo Shmysics demo, I bet I
could make something even cooler right
here.

John Bernoulli begins digging around in the ground at the base of a nearby tech dump tree (a tech tree if you will).

JOHN BERNOULLI
Hah, I bet I can make something that
poisons Ssinrok, takes away his money,
and even lowers his rating on
ratemyprofessor.com all on my own.

John Bernoulli begins taking random junk pieces and hitting them together.

JOHN BERNOULLI
Now if I can only find that magnetic
monopole...

John Bernoulli suddenly drops his parts and kicks them. They start to walk away, but stop and turn on the spot.

JOHN BERNOULLI
Wait, did that part move like a heavy
symmetric top, or was that just me?

John Bernoulli pauses, and then sighs and sits back down in the chair.

JOHN BERNOULLI
It's no use...

John Bernoulli slumps over a bit and sits there a while.

NARRATOR

Little did John Bernoulli know, that part could be modeled as a symmetric heavy top. If he was interested, he could have read about it in chapter 9.6, page 260 of my book: Classical Mechanics. Furthermore, if John Bernoulli had looked closer, he would have seen that although unique, each of his companions were not the blockheads he saw them to be. The Assassin masterfully wielded their tricks, rooted in physics and mechanics. The Scientists' ideas were dreamt up from exploration of fundamental theorems, and the Money Guy... well they were just the Money Guy.

John Bernoulli weakly raises their head and looks around.

JOHN BERNOULLI

Huh? Who said that? Is there someone there?

John Bernoulli gets up and checks behind and under their chair.

JOHN BERNOULLI

Hmmm, must've been the wind.

John Bernoulli stops and looks at the sky.

JOHN BERNOULLI

I think... no, I *know* what I need to do now.

John Bernoulli walks off to the right of the stage and the Assassin, Money Guy, and Scientist walk in from the left. They sit down in a sort of circle.

ASSASSIN

I'm not really sure what to do now, I'm not sure if we can set up a demo fast enough to beat Ssinrok and hold it off.

SCIENTIST

We might still be able to, but we're not coming out of it unscathed, if only John Bernoulli just trusted my demos.

ASSASSIN

YOUR Demos?!? All they do is crash and burn. Maybe if Ssinrok came to accepted students day, we could have him try one of YOUR demos and he'd be hospitalized.

MONEY GUY

Hey! Without John Bernoulli, we just have us, right? I've learned now that teamwork isn't a transaction, we just need to trust each other.

ASSASSIN

Sorry, you're right, I guess I'm willing to try one of the Scientist's ideas, but I WILL be checking it first.

SCIENTIST

I guess... we can work on the demos together.

Assassin, Scientist, and Money Guy all try to do a three-way high five (not sure what that'd look like).

John Bernoulli walks on stage to the trio carrying a chair and sets it down and sits on it.

JOHN BERNOULLI

I have a plan... and I'll need all of you to get it to work.

John Bernoulli and the rest of them stand up.

SCIENTIST

So boss, what's this big plan of yours?

John Bernoulli points to the right side of the stage.

JOHN BERNOULLI

Scientist, Assassin, go to that clearing and grab as many parts as you can carry, money guy, get your cash and

prepare for some overdraft fees. It's
time to **build, team.**

(The part where John Bernoulli says "build, team" has to be super emphatic and slower than the rest of the sentence.)

Scene 8: TECH DUMP FOREST - NIGHT 2X:00 PM

Immediately following scene 7. The Scientist and Assassin look at each other and shrug, then walk to stage right. There are random pieces of junk strewn about, and they begin collecting them. John and Money Guy stroll to stage left.

JOHN BERNOULLI

Look Money Guy, I don't know who you are, but thank you for talking me out of that back there. I'm sorry, but I have to ask a favor of you.

MONEY GUY

(Nervously) Anything... anything at all.

JOHN BERNOULLI

We're going to need a distraction, and you know Ssinrok best out of all of us. Can you and the Scientist go up and try to talk with him, maybe pretend that you want to join his side again? We just need to buy some more time.

MONEY GUY

Umm... sure I can. Certainly I can.

JOHN BERNOULLI

Perfect.

All meet at center stage.

JOHN BERNOULLI

Alright team, here's how this is gonna go. We know Ssinrok is probably still looking for us, so you, Doctor, and you, Money Guy, will go and distract him. Pretend you want to join him. Meanwhile, the Assassin and I will work on a way to defeat him. Sounds good to everybody?

SCIENTIST

Sorry, what was that part about me joining that scoundrel who destroyed my village?

JOHN BERNOULLI

Yes, that's exactly right. Let's do this.

John and the Assassin walk stage left and start tinkering with the parts. The Scientist and the Money Guy walk stage right, Ssinrok enters stage right.

SSINROK

There you are. But where is that John Bernoulli?

MONEY GUY

We don't know. He and the Assassin left us. Behind. Ssinrok, we want to join you.

SSINROK

Ha! You really think it's that easy? I don't want traitors like you on my team. But, if you tell me where John is, I may just spare your lives.

SCIENTIST

We told you, we don't know where he is. I've personally had quite enough of Mr. Bernoulli. He thinks he's better than everyone. He may act like he's changing, but when it comes down to it, he doesn't trust anyone but himself.

SSINROK

If you two can't help, then get out of my way. I must find him.

There is suddenly a commotion from John and the Assassin.

JOHN BERNOULLI

No, it should go like this! Here, give me that.

ASSASSIN
Quiet, John. Look, if you think you
know everything, just do it yourself,
alright?

SSINROK
(Looks past the Scientist and Money Guy)
Aha! There he is.

Ssinrok fires the air cannon (or some kind of projectile). John jumps away, exposing the Assassin. The blow strikes her squarely in the chest, and she falls backwards almost offstage, and lays unmoving.

JOHN BERNOULLI
No!

SSINROK
Alright, all three of you, line up there.

John, The Scientist, and Money Guy line up center stage.

JOHN BERNOULLI
I'm so sorry everyone. This is all my
fault.

SSINROK
Quiet! It's time to show you what it's
gonna be like when I'm in charge around
here.

The Assassin comes up from behind and whacks Ssinrok on the head with the stick. He slowly falls to the ground. Everyone is quiet for a few seconds.

(SCENE CHANGE)

Scene 9: TECH DUMP FOREST - NIGHT 2X:00 PM

Scene 9 picks up exactly where scene 8 left off. One might even ask why they are not the same scene. 9 is a much nicer number than 8 though. John Bernoulli stands with Assassin, money guy, and scientist.

SCIENTIST
Ssinrok is gone for good!

MONEY GUY

He can't menace the innocent people of
our world any longer.

JOHN BERNOULLI

It's finally over.

ASSASSIN

Wait... what's that?..... It's a key!
(Picks up the key)

SCIENTIST

Maybe it unlocks that strange tiny
wooden door in the corner.

JOHN BERNOULLI

Let's try it.

NARRATOR

They unlock the door with the key that
they very conveniently found. However,
it doesn't lead to anywhere they
recognize. It leads to a small room
with tables, shelves, and oddly, a
giant motor. It is crammed with strange
bottles, wires, wood pieces, tools, and
probably anything else you can think
of.

(SCENE CHANGE)

MONEY GUY

What is that room?

NARRATOR

Keen listeners may recognize it as-

JOHN BERNOULLI

The Build Team room! Oh thank goodness!

ASSASSIN

The Build Team room?

JOHN BERNOULLI

That's where I came here from! I can go home!

SCIENTIST

(Looks at the open door curiously) Is it some sort of laboratory?

JOHN BERNOULLI

Uhhh. Not exactly?

MONEY GUY

You're leaving?

JOHN BERNOULLI

Yeah, I have to get back home.

SCIENTIST

Well, it's been a pleasure. Do lots of cool physics in that lab of yours!

JOHN BERNOULLI

It's not a... oh, whatever. Thanks!

MONEY GUY

We couldn't have defeated Ssinrok without you. And because of you, I'm going to follow my dreams and be a physics teacher.

ASSASSIN

You definitely know how to have a good adventure. And... I'll miss you. Stay safe.

JOHN BERNOULLI

Aww, I'll miss you too. Don't die again any time soon. I wouldn't have survived without your help. Without all of your help. And you've all taught me so much.

SCIENTIST

All in a day's work as a scientist!

MONEY GUY

And physics teacher.

Everyone looks at the Assassin.

ASSASSIN

Yeah, no. Not my thing. (*Fondly*) Just go home already.

JOHN BERNOULLI

Alright, alright, I'm going. Bye!!

NARRATOR

John Bernoulli steps through the door into the Build Team room, and the portal closes behind him.

J does a dramatic step. Assassin, money guy, and scientist get offstage somehow, and members of Build Team are now onstage.

Narrator: He looks back to see...

(SCENE CHANGE)

JOHN BERNOULLI

The portal was in the fridge!? Huh, I always wondered what was in there.

BUILD TEAM CAPTAIN

John!? Where were you, it's 7:56?

OTHER MEMBERS

Yeah!/ Where were you?/ What were you doing?/ etc.

JOHN BERNOULLI

I was... uh... at the tech dump. But where I was doesn't matter, I have some things I wanted to tell you all.

Everyone is surprised.

BUILD TEAM CAPTAIN

What? You do?

JOHN BERNOULLI

I've realized a few things in the past...
uh... hour. I'm sorry for everything I
said earlier. Build Team is awesome,
and everything we do- teaching middle
schoolers included- is really
important. You all are my friends, and
I want you to know that.

MEMBERS

Thanks!/ Build Team is awesome!/ etc.

JOHN BERNOULLI

*(Starts singing the Build Team
theme song)*

Sing it with me!

Everyone sings the Build Team theme song.

In Build Team
Concrete room where dreams are made of
There's nothing you can't do
Now you're in Build Team
This room will make you feel brand new
The fires will inspire you
Lets hear it for
Build team, Build Team, Build Team

In Build Team
Concrete room where dreams are made of
There's nothing you can't do
Now you're in Build Team
This room will make you feel brand new
The fires will inspire you
Lets hear it for
Build team, Build Team, Build Team

EVERYONE

Yay!! Build Team!!

(Possibly insert fun one liner. I can't think of anything good.)

NARRATOR

And John Bernoulli learned that Build
Team wasn't only about cool science,
but also about teaching others, working
together, and having fun. Which is why

this whole musical exists, and why you
should come to Build Team! Thank you to
everyone for coming!

(Everyone comes and bows)
